17 October 2017

To Whom It May Concern,

Climate-KIC is Europe's largest public-private innovation partnership focused on climate change, consisting of dynamic companies, the best academic institutions and the public sector. We are one of three Knowledge and Innovation Communities (KICs) created in 2010 by the European Institute of Innovation and Technology (EIT). We integrate education, entrepreneurship and innovation resulting in connected, creative transformation of knowledge and ideas into economically viable products or services that help to mitigate climate change. One of our flagship global education programmes is the Climathon running over in 100 cities throughout the world simultaneously on the 27th October, 2017.

It is a pleasure that Dr. Afsaneh Moradi together with the Karafarinan Tossee Hezare Sevom-KTHS will act as a host organizer and institute for the event. They applied and are authorized by Climate-KIC as the Climathon 2017 organizers/managers in Iran. This letter certifies that they are accredited by Climate-KIC to hold the event in Iran.

The following cities have applied and have been accredited for organizing Climathon 2017 event in addition to Tehran: Karaj, Isfahan, Shiraz, Tabriz, Mashhad, Ahvaz.

Climate-KIC would like to invite all the public and private authorities in Iran to support and help this event for solving the environmental challenges in developing countries as part of Climate-KIC global strategies.

Thank you for your support!

Kindest regards,
